Candidate's Name:
Mobile No:
Email:

Task 1: Create a basic Discord bot with basic commands (as many as you can) e.g. Ping, delete log, clear chat, etc. Send a video recording of the work along with the code files attached.

Or

Task 2: Create a simple dashboard in React. Design as many components as you can from the attached sample keeping in mind best coding practices with clean formatted code. Share the link to the Github repo wherein you've pushed all the required files
